

MOHAMED GAMAL MAHMOUD

HEALTHCARE & BUSINESS DATA ANALYST

 Damietta, Egypt  +20 1127075974  mohgamgha@gmail.com  [Live Portfolio](#)  [GitHub](#)  [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with over 2 years of experience in healthcare statistical management and data analytics. Specialized in leveraging **Python (Pandas, Plotly, Streamlit)**, **SQL (SSMS)**, and **Power BI** to clean, analyze, and visualize complex healthcare billing and sales operations. Proven track record in optimizing hospital record-keeping, monitoring operational KPIs, and delivering interactive web dashboards that support data-driven decision-making.

CORE COMPETENCIES & TECHNICAL SKILLS

Programming & Analytics

Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL (Aggregations, Joins, Subqueries, Window Functions).

Business Intelligence & Web Apps

Streamlit, Power BI, Advanced Microsoft Excel (Pivot Tables, Advanced Formulas).

Healthcare Domain Knowledge

Electronic Health / Medical Records (EHR / EMR), Health Statistics, Hospital KPIs, Billing Analytics.

Data Engineering & Practices

Data Cleaning & Transformation, Exploratory Data Analysis (EDA), Relational Databases (SSMS).

KEY FEATURED PROJECTS

Interactive Analytics Portfolio (Streamlit Cloud)

[Python](#), [Streamlit](#), [Plotly](#), [SQL](#)

- Built and deployed a bilingual (Arabic/English) interactive web application hosting clinical, billing, and sales analytics dashboards.
- Healthcare Billing Dashboard:** Visualized patient admission metrics, billing distribution across medical specialties, length of stay (LOS), and insurance provider shares.
- AdventureWorks Sales Analytics:** Engineered interactive temporal line trends and regional sales distributions with dynamic multi-criteria user filtering.

PROFESSIONAL EXPERIENCE

Statistical & Medical Records Technician / Data Analyst – Ministry of Health

Oct 2024 – Present | Damietta, Egypt

- Manage and maintain EHR/EMR databases, ensuring high data accuracy and integrity across patient medical records.
- Extract and analyze monthly operational hospital metrics (patient volume, length of stay, bed occupancy rates).
- Develop data visualizations and statistical reports to facilitate data-driven decisions for healthcare administrative teams.

Data Analytics Specialist (Healthcare Unit) – Basatin Health Unit

Mar 2023 – Oct 2024 | Damietta, Egypt

- Handled health statistics, patient intake record validation, and data cleaning for regional primary care operations.
- Optimized reporting efficiency by building automated data consolidation workflows using Python and Advanced Excel.

EDUCATION

Diploma in Medical Informatics & Health Records Management – Technical Institute of Health

Graduated: 2023 | Port Said, Egypt

LANGUAGES

Arabic: Native **English:** Professional Working Proficiency
